DETAILED ACTION

The previous office action, inadvertently referred to incorrect claim numbers, the previous office action is hereby vacated and a new office action is made below.

The period of response will be restarted.

Allowable Subject Matter

1. Claims 1, 3-15, and 18-26 are allowable, however are subject to the double patenting rejection below.
2. The following is a statement of reasons for the indication of allowable subject matter: The claims distinguish over the prior art whereby in the environment of the reciprocating mixing head apparatus of the sort recited, the claim requires a particular cooperation of the reciprocating means in structural cooperation with the inner diameter, outer diameter stroke length and cycle duration of the mixing head.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory

Art Unit: 1723

double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1, 3-15, and 18-26 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-26 of U.S.

Patent No. 6,830,369 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the examined claim(s) fully encompasses or anticipates the claims of the patent 6,830,369, in particular the patented claim the mixing head of the sort claimed with a tubular blade portion and inner and outer surface fully encompasses the claimed blade and inner an outer diameter of the blade.
